CIR CUIT

Discover every step of the manufacturing process of precious silk fabric in the skills demonstration area.

SILK IN LYON presents an informative and, for some workshops, participatory visitor tour providing a full and concrete overview of the silk industry through 6 key stages: sericulture (silkworm breeding), unwinding and reeling, weaving, pattern design, printing and finishing. Well worth Discovering!

STEP 1

sericulture

STEP 2

spinning

STEP 3

weaving

STEP 4

design

STEP 5

printing

STEP 6

finishing

ACTI VITIES

SILK IN LYON has laid on a unique cultural programme with silk as the common thread.

Industrial and historic heritage, culture, scientific approaches and innovations, and variations on silk are all to be discovered in the activities we have organised for you.

o conferences

o exhibitions

o for families

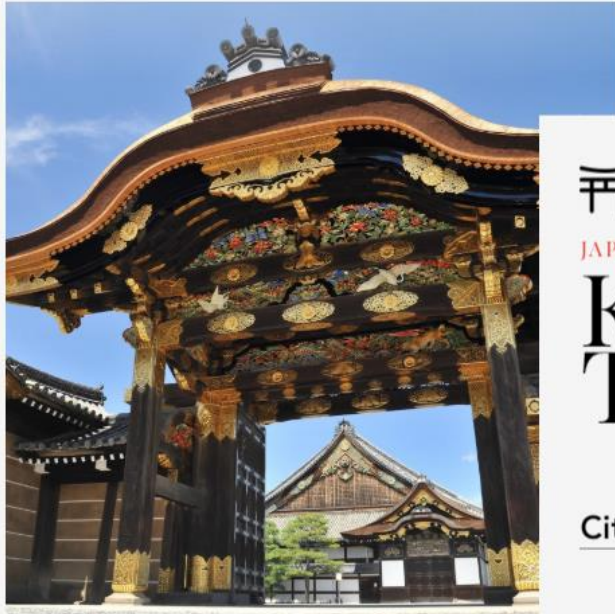

o guided tours

o performances

o screenings

o workshops

o outside the exhibition

JAPAN

KYO
TO

City of Honour 2019

For our festival, Silk in Lyon is paying tribute to the city of Kyoto and its know-how.

With a history dating back thousands of years, Kyoto is characterised by its traditional culture known as “Miyabi” or “Culture of Elegance”. It is commonly associated with traditional tea ceremonies, the art of flower arranging, Noh and Kyogen theatre (a comedic form of traditional Japanese theatre).

These traditional, living arts were first established at the Imperial Court and continue to influence everyday Japanese life, while their advanced techniques have driven and inspired the industry. The “kimono”, a traditional Japanese garment, is the perfect example. During the exhibition, the city of Kyoto will showcase silk brocades produced in the Nishijin and Tango districts.

Nishijin is Japan’s largest silk fabric production region for kimonos. The textile industry in Nishijin is known for its advanced technology and creative designs.

Another historic silk district is Tango, where weaving dates back more than 1,300 years. In 711, the then Emperor sent weavers all over the country to learn how to weave silk. In 1720, the Chirimen weaving technique, formerly used in the Nishijin district, was imported in Tango.

Tango Chirimen silk was thus born and has been produced ever since.

PRACTICAL INFORMATION

See all the useful information for preparing for your visit!

Location : Palais de la Bourse - Place de la Bourse, 69002 Lyon

Dates and times

- Thursday 21 November 2019
from 14.00 to 19.00
